

BI-CO BITES

SMART DINING DECISIONS FOR THE BI-CO
COMMUNITY

PROBLEM

1.

**DINING INFORMATION
IS FRAGMENTED
ACROSS MULTIPLE
PLATFORMS**

2.

**STUDENT INPUT IS
INVISIBLE DUE TO
NON EXISTENT
FEEDBACK LOOP**

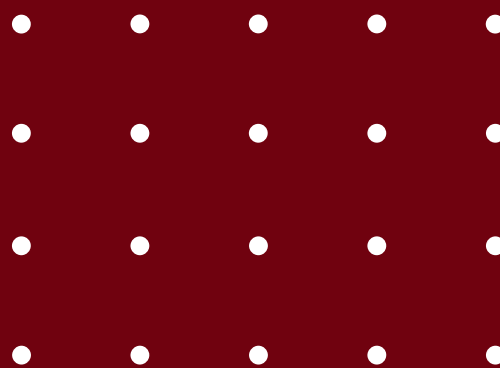

3.

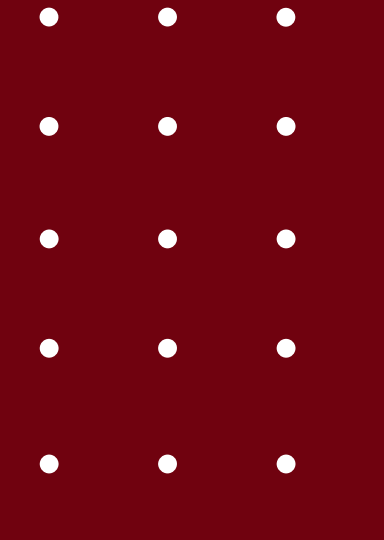

**FOOD IS PRODUCED
WITHOUT
CONSUMPTION
CERTAINTY,
LEADING TO WASTE**

OUR SOLUTION

ONE PLATFORM

All dining decisions.
Real feedback.
Less waste

What is it?

A web and mobile based platform that connects Bi-Co students with dining services through real-time data and active feedback

Lets Students

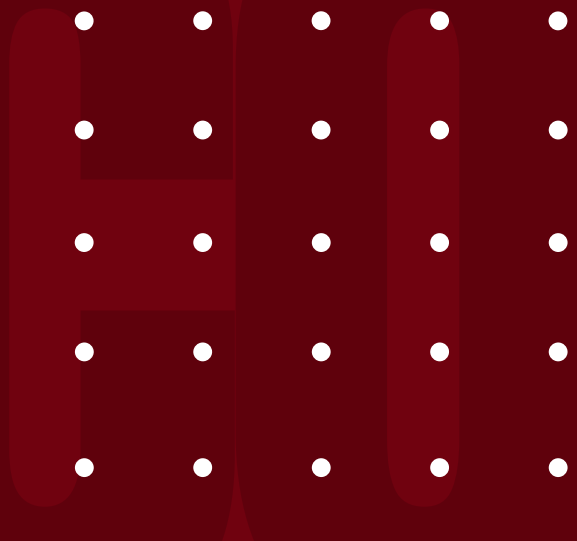

- Rate dishes (simple 5 star system)
- Vote in bi-weekly polls
- Volunteer to deliver food to shelters

What it does

Shows:

- Line status
- Dining events & international bars
- Menus with allergens

Helps Dining Services

- Track popular vs wasted dishes
 - Adjust menus
 - Partner with local shelters
- 

TARGET USERS

01

PRIMARY

Bi-Co students
Care about time, dietary
needs, and food quality

02

SECONDARY

Dining staff
Need real-time feedback
and waste insights

Bi-Co
Students

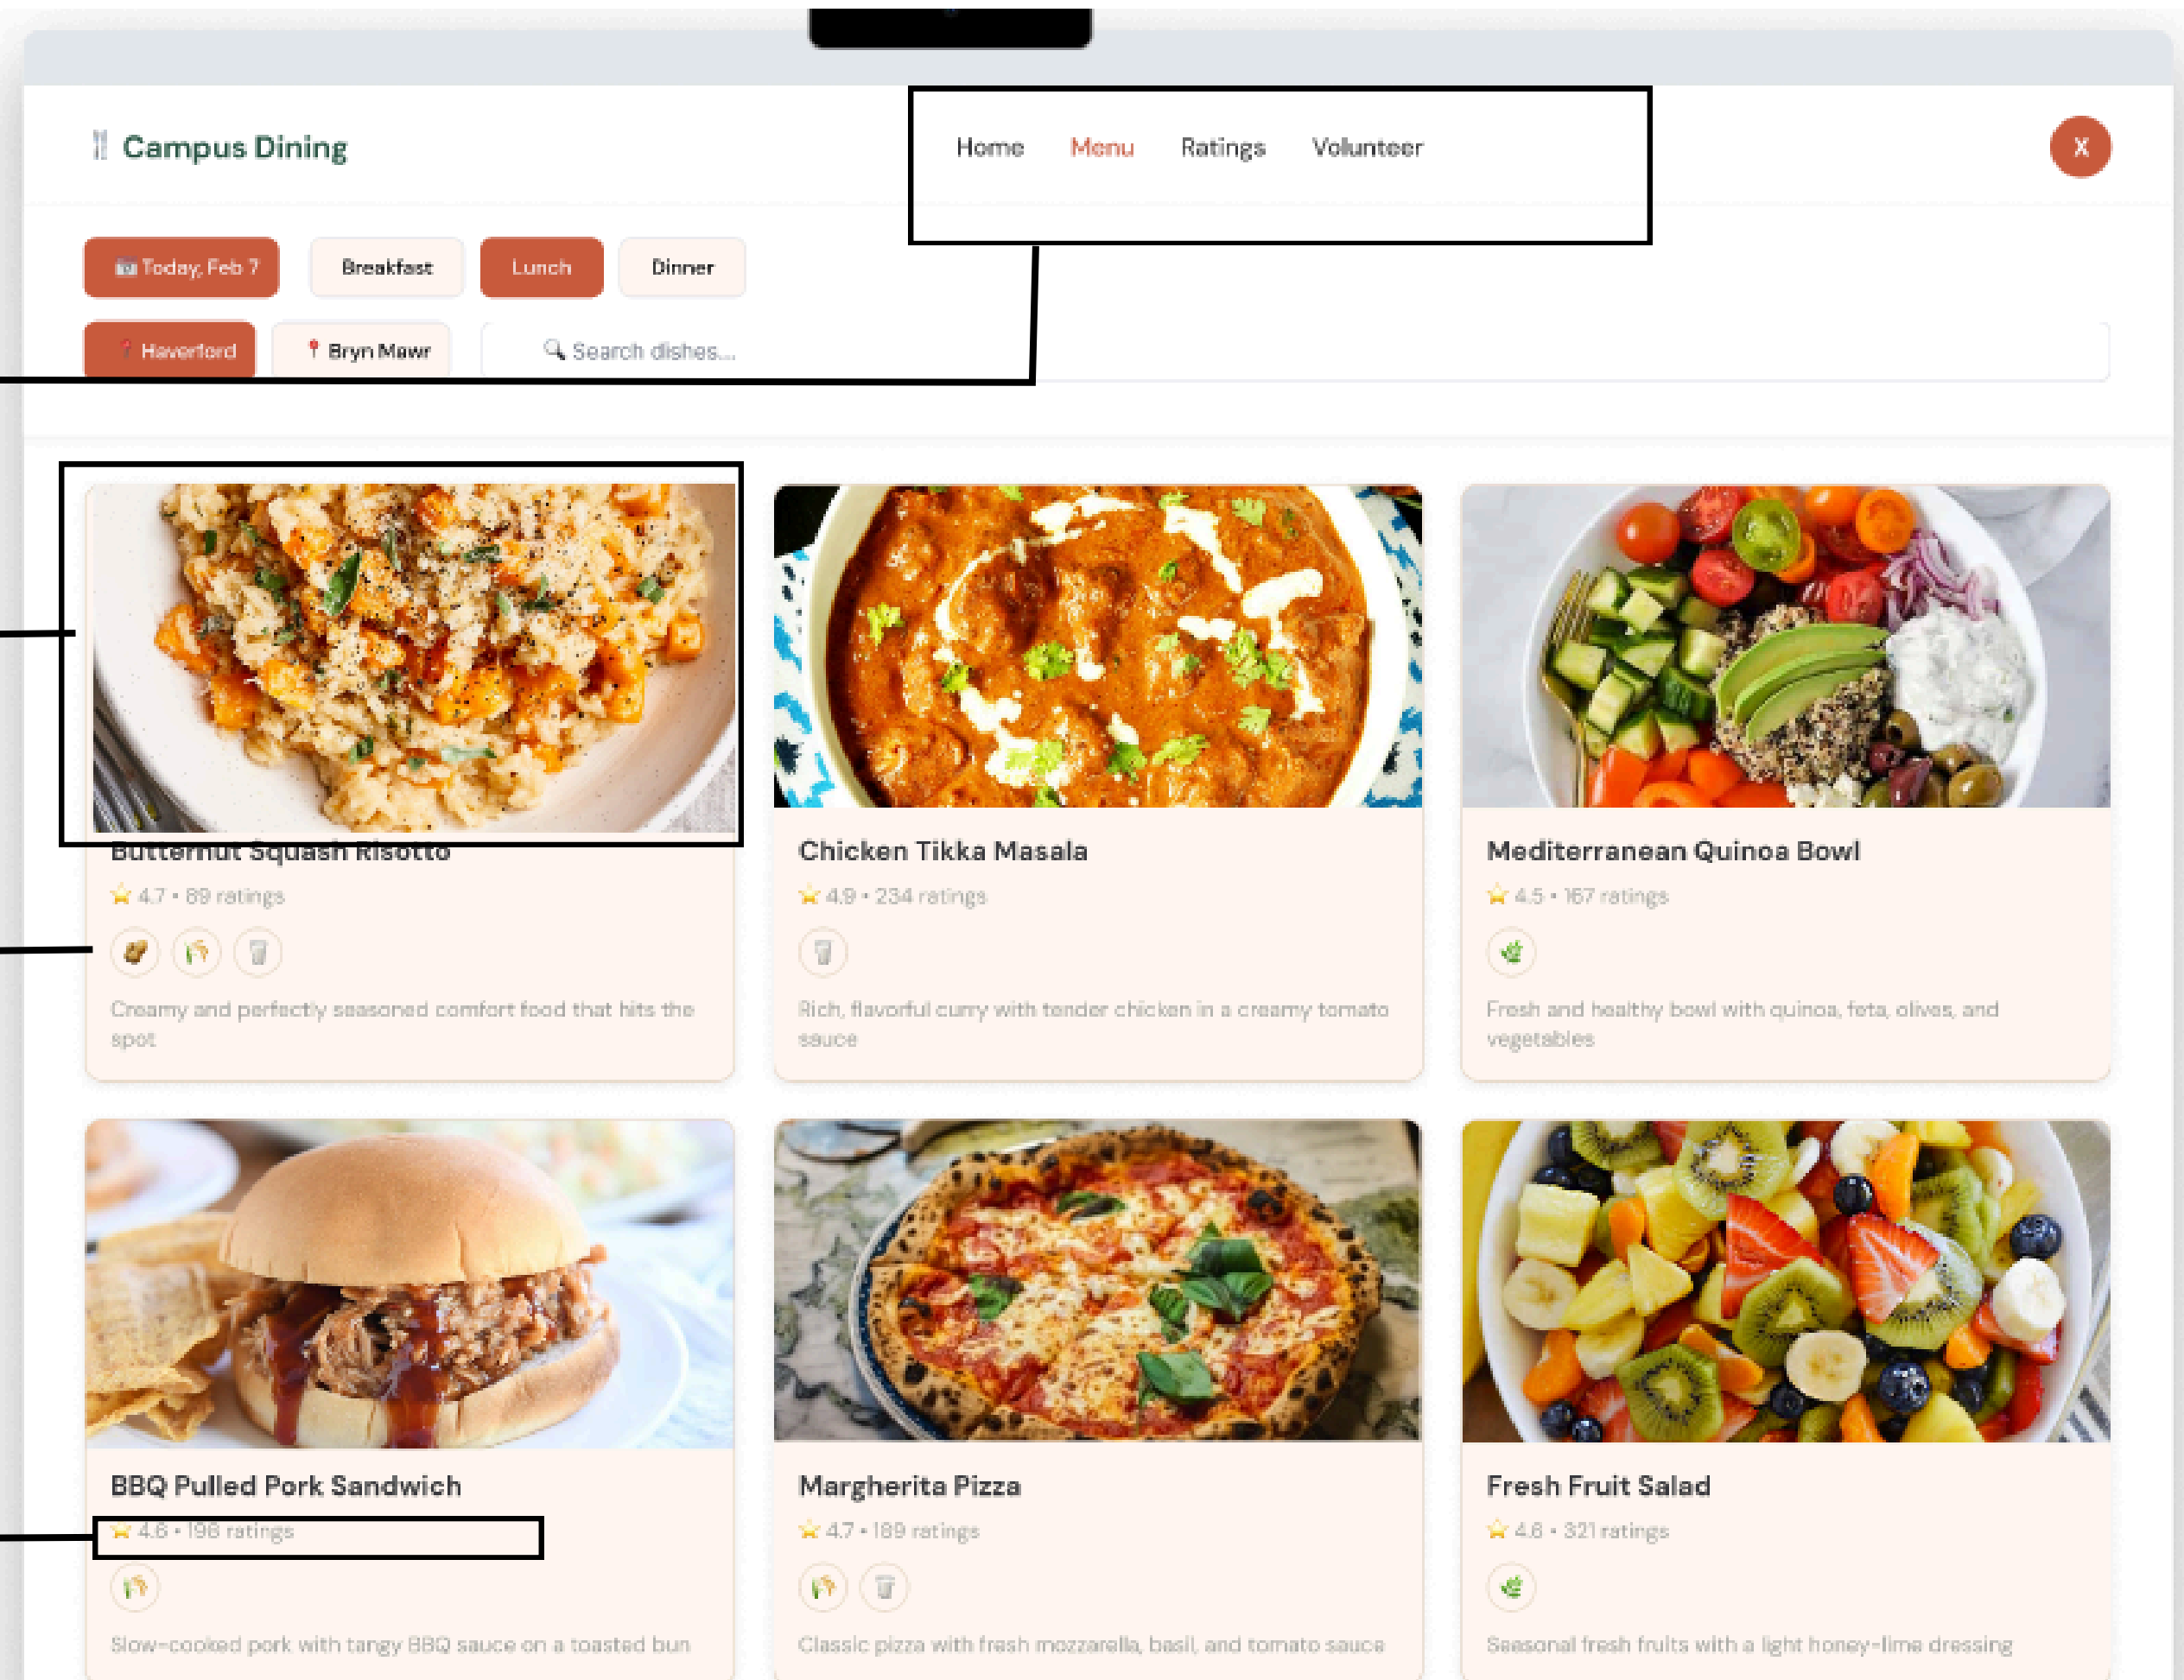

INTUITIVE NAVIGATION BAR

PHOTOS REPLACE GUESSWORK
WITH VISUAL CLARITY.

QUICK ALLERGEN INDICATORS FOR
FAST, SAFE DECISIONS.

AGGREGATED STUDENT RATINGS
HIGHLIGHT POPULAR AND RELIABLE
DISHES

WHY DOES IT MATTER?

STUDENT IMPACT

- Saves time
- Improves accessibility (dietary info)
- Makes feedback visible and rewarding

DINING IMPACT

- Understands what students actually eat
- Appreciation of Dining staff's efforts.
- Improves planning

SUSTAINABILITY IMPACT

- Identifies wasted meals
- Encourages conscious dining
- Enables donation partnership

BLOG

STATS

On average, a U.S. college student generates about 142 pounds of food waste per year from campus dining (CBORD)

37 % of college students were dissatisfied with their campus dining facilities (INSIDE HIGHER ED)

Testimonial

Steven Sensenich
Manager Of New
Dorm Dining Hall

“

DINING SERVICES VALUE REAL-TIME STUDENT FEEDBACK AND SEES STRONG POTENTIAL IN AN INTERACTIVE, STUDENT-CENTERED DINING WEBSITE. FEATURES LIKE LIVE MENU VOTING, INTEGRATED ALLERGEN INFO, AND REAL-TIME LINE INDICATORS COULD IMPROVE COMMUNICATION, REDUCE RUSHES, AND SUPPORT SUSTAINABILITY EFFORTS. THE PROJECT ALIGNS WITH DINING SERVICES' GOALS OF BETTER FEEDBACK, AWARENESS, AND WASTE REDUCTION.”

”

CHALLENGES

1.

STAFF ADOPTION

- Transitioning from existing systems
- Ensuring consistent updates

**SOLUTION: PILOT PROGRAM +
WORKFLOW-ALIGNED DESIGN**

2.

STUDENT ENGAGEMENT

- Changing habits
- Sustaining volunteer participation

**SOLUTION: INSTITUTIONAL ENDORSEMENTS &
CAMPUS PARTNERSHIPS**

COMPETITOR

MEAL CHOICE CONNECT

- Nutrition info only
- Separate systems per campus
- No feedback feature
- No waste tracking

BI-CO BITES DIFFERENCE

- One unified Bi-Co platform
- Real-time info & student feedback
- Waste analytics for dining
- Surplus food donation pipeline

ONLY PLATFORM COMBINING CONVENIENCE, DATA, AND COMMUNITY IMPACT.

BUSINESS VALUE

PRIMARY USERS – STUDENTS

- Faster decisions
- Transparency
- Real influence on menus

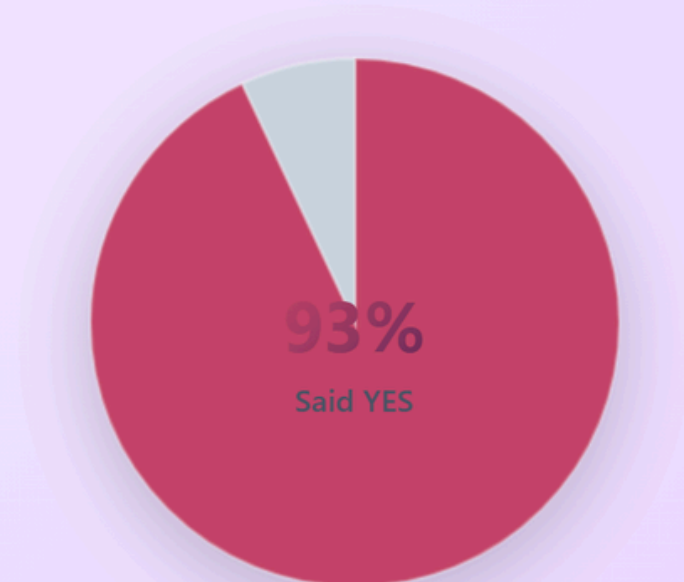

BLOG

BITES

Would Students actually use it?

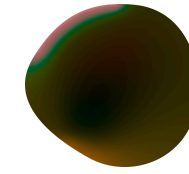

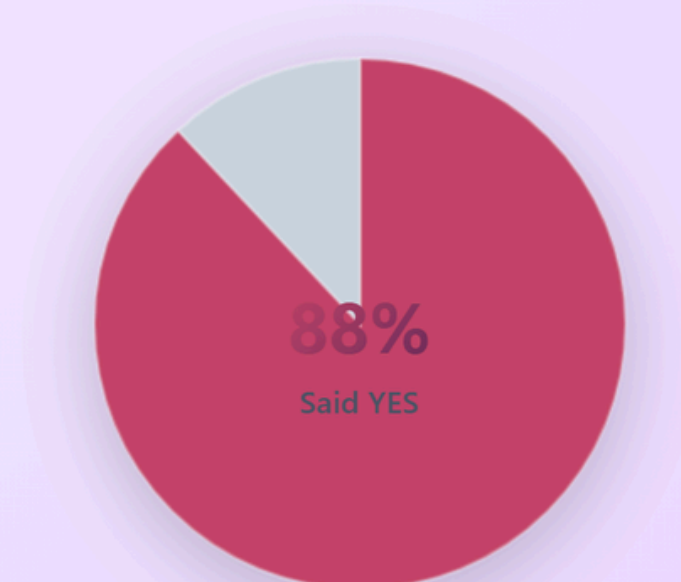

Student Survey Results

"Would you use a website for dining services that lists all dining information and includes student feedback?"

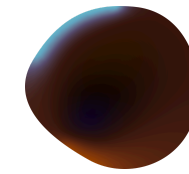

Student Survey Results

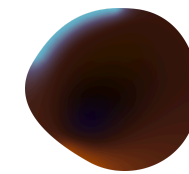

"Would you volunteer to deliver surplus food to local shelters for community service hours?"

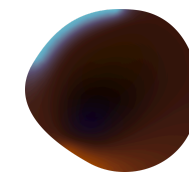

Yes. We surveyed 48 students, and the response was overwhelmingly positive.

Students repeatedly have expressed wanting to give feedback, but having no direct platform for it.

Reporting issues would take less than 30 seconds.

It makes the campus cleaner and more sustainable for everyone.

THE ASK

01

Pilot access to dining
data

02

Student & staff feedback

03

Support to iterate and
scale

BITE-GO

FUTURE SCOPE

- Expansion across Tri-Co dining
- Expansion to other colleges and universities
- Sustainability dashboards
- Incentives (poll-driven menus, rewards)
